

WATERBUS 700

An economical boat comes with a seaworthiness certificate or a CE certificate. The boat is fitted with easily folding transparent screens made of material, which are very comfortable for the passengers regardless of the weather. The installation of a small forced air heating system will prolong the season significantly.

Thanks to hulls (pontoons) with perfect sailing parameters the boats can be driven with a small economical outboard engine, which ensures full manoeuvrability even on rapid rivers.

Technical data:

Total length with engine:	7,15 m
Total length of the hull:	6,40 m
Maximum breadth:	2,60 m
Hull draught:	0,35 m
Approximate empty weight:	1100 kg
Height above CWL:	2,35 m
Total height:	2,70 m
Number of passengers:	9
Outboard engine:	9,9 - 25 HP
Fuel tank:	42 l
Water tank:	----
Design category:	D
